CAREER OBJECTIVE

I'm Srinivas Sayinni, a Passionate and results-driven final-year student at CMR Institute of Technology, Hyderabad, skilled in Python, Java, HTML5, CSS, JavaScript, and Automation, with hands-on experience in developing web-based platforms and automation systems to improve efficiency and user experience. Proficient in web scraping, email automation, responsive design, task scheduling, and Git/GitHub version control, with a strong focus on solving real-world problems through innovative and impactful technological solutions.

EDUCATION

CMR Institute of Technology, Btech	11/2022 – Present Hyderabad
Srichaitanya Junior College, MPC	05/2020 – 06/2022 Khammam
Winfield High School,SSC	01/2016 – 04/2022 Khammam

SKILLS

Programming Languages

Java, python, c(Basics),c++(Basics)

Database

MySQL

Soft Skills

Analytical Thinking, Problem-Solving, Quick Learner, Teamwork, Effective Communication

Backend Development

Java(Spring Boot)
Basic

RPA & Data Tools

UiPath, Tableau

Concepts

OOPS, DBMS, Operating Systems, Computer Networks

Cloud & Tools

OCI (Oracle Cloud Infrastructure)
Intermediate

Git / GitHub

Intermediate

CERTIFICATES

AI Fundamentals with IBM SkillsBuild, Cisco [🔗](#)

Successfully completed the AI Fundamentals with IBM SkillsBuild course and achieved the student level credentials. The credential earner demonstrates knowledge of basic artificial intelligence (AI) concepts, such as natural language processing, computer vision, deep learning, etc. Earner has also been exposed to the ethics of AI and is aware of the skills required for success in various roles in the domain.

HTML5 & CSS Application Development Fundamentals, Infosys Springboard

SaWiT.AI Challenge, HCLTech [🔗](#)

Python, HCLTech [🔗](#)

PROJECTS

Automob-mechanic shop

Automob Mechanic is a web-based platform designed to simplify car service management. It allows users to easily book appointments for maintenance, body repair, and car care services, with a seamless online payment option. Built with a focus on user convenience and efficiency, Automob Mechanic streamlines the entire vehicle service experience from booking to completion. Note: (use laptop for better experience. I apply Responsive design in further for better experience in mobile phones)..

YOLO-ESCA: A High-Performance Safety Helmet Standard Wearing Behavior Detection Model Based on Improved YOLOv5

Here is a summary version of Option 2:

Project: YOLO-ESCA High-Performance Safety Helmet Detection Designed and implemented **YOLO-ESCA**, a novel deep learning model based on a modified **YOLOv5** framework to enhance occupational safety. The model was trained to accurately classify helmet-wearing *behavior* (standard, incorrect, or none), moving beyond simple presence detection. It achieved high-performance results, enabling real-time analysis of safety compliance.

Automated Job Alert System for Software Roles (Email daily at 12 PM IST)

This project is an automated job alert system that helps users receive a curated list of software job openings at startups and top MNCs directly to their email daily at 12 PM IST. Built using Python and hosted on GitHub, it scrapes job listings, filters them based on relevance, and ensures users never miss an opportunity in their preferred domain
